

Manuscript selection-reviewing of the articles and instructions for authors

The journal is a semiannual academic publication whose objective is to provide the academic and scientific community and researchers with a platform that allows them to address issues related to health, industry, natural resources and technology.

Material offered for publication must be original, inedited and not under simultaneous consideration by any other journal nor published anywhere else. In order to meet these criteria, the author will be able to download the statement of originality format from the website of the journal: <http://www.revistaiiqb.usac.edu.gt>

Submission of a manuscript does not constitute any commitment from the journal to publish the paper. All authors are responsible for the content. The first author assumes intellectual responsibility for the results of the editing process. The authors are responsible for obtaining copyright permission in order to reproduce graphic or photographic material of third parties.

The authors assume responsibility for any falsification of data or fraud in the publication.

They also commit not to re-use previously published material, in whole or in part. The first author will receive a free copy of the journal in which his/her paper was published.

Manuscript selection

All works undergo two stages of evaluation:

They are first read by the Editorial Board to ensure that the manuscript meets the minimal standards as required by the journal. If it is

accepted, this Editorial Board proposes two reviewers who have knowledge of the field discussed in the manuscript, and to whom the paper will be sent (peer review).

Both reviewers will use a piece of paper where the evaluating aspects will be specified. During the entire process the anonymity of both the reviewers and the authors will be maintained.

In case of discrepancy between the accepted and the rejected papers, the manuscript will be sent out to a third reviewer, whose decision will determine its publication, in this case.

The final decision is irrevocable.

Copyright transfer agreement

The author(s) grant permission for their paper to be published in the journal and through electronic means. The copyrights of published articles are transferred to the Faculty of Chemical Sciences and Pharmacy of the San Carlos University of Guatemala after academic and editorial acceptance of the original work to be published and distributed, both printed and electronically. The author(s) retain their moral rights according to the law. The Copyright Transfer Agreement form will be available for download in the website <http://www.revistaiiqb.usac.edu.gt>

The journal is available to the public for free on the website <http://revistaiiqb.usac.edu.gt>.

All its contents can be used for free and for noncommercial uses, giving credits to the authors and the journal.

The Scientific Journal of the Faculty of Chemical and Pharmaceutical Science is the bulletin of the research activities from the Faculty.

The Scientific Journal provides publishing consideration to all article sent that contains original research material in its totally and has not been published or is not under editorial review in its essential part in any other form of publication in paper or electronic. If it has been published previously partially (example in congress) should be included in the cover letter and at the end of the summary and abstract.

The documents should be sent to the editor to the following e-mail address: almadariaga@hotmail.com.

Articles accepted to be published are posted on the Internet in a PDF file that is of free access. Web Site: <http://www.revistaiiqb.usac.edu.gt>

The Scientific Journal post the following works: 1) Original Articles 2) Review Articles 3) Letters to the editor. Review Articles are considered just as an invitation. Documents must be written in a (1.5 line), font Times, font size 12 and must be numbered at the bottom of each page, including the one where title is located. It must be sent by email in MS Word format. Figures and pictures will be received in JPG format. Charts and graphics will be received in MS Excel format.

Original Articles: They're articles addressed to inform about the results of the original investigation in the fields of: health, industry, technology and environment. They will be placed in the following order:

Title, relationship with the authors and responsible author including address, phone, fax and e-mail. Summary in Spanish language (including five key words at the

end) Title and summary in English language (including five key words at the end) length of 250 words in separate sheets.

- o Introduction
- o Methods and Materials
- o Results (tables, graphics and pictures)
- o Discussion
- o Acknowledgement
- o References

Review Articles: The purpose of this section is to present bibliographical-review articles regarding outstanding health, industry, technology and environment matters. These articles compare methods, results and conclusions of original works and they will be shown with invitation only.

Letters for the editor these letters are short statements with the following objectives: 1) Promulgating discussion regarding works published on the magazine.

Letters to the editor: These letters are short memorandums with the purposes of: 1). Stimulate the discussion of published works in the Scientific Magazine or write constructive points of view, no larger than two pages and in a period of time no longer that two months after the article has been published. 2) The communications of short scientific observations. In this case it is permitted threes pages maximum, a spreadsheet or figure and five references.

The quotes in the text, references, spreadsheets and figures have to be elaborated according to the rules of the American Psychological Association, (APA). Every work will have to include a main letter with the name of every author and e-mail addresses.
